

WE PROUDLY CARRY COVID-19 VACCINES TO MORE THAN 300 DESTINATIONS AROUND THE WORLD

As Turkish Cargo, we stand out with the Istanbul-based air cargo bridge we have established across the continents, our strong fleet, wide flight network reaching more than 300 destinations and high level of service quality.

We carry Covid-19 vaccines with our advanced technology, IATA CEIV Pharma certified HUB, expert team and premium solutions under the guarantee of TK Pharma in the fastest, safest and most careful way!

WE ARE AWARE OF OUR RESPONSIBILITIES

SHIPMENT TO MORE THAN 300 DESTINATIONS

We, as the air cargo brand flying to the more countries than any other airline, carry COVID-19 vaccines to more than 300 destinations.

STORAGE CAPABILITY BETWEEN -20°C AND +25°C

We store COVID 19 vaccines in dedicated temperature controlled storages between -20 ° C and + 25 ° C at our Istanbul Hub.

COVID-19 VACCINE TRANSPORTATION STANDARD OPERATING PROCEDURE

SOP (Standard Operating Procedure) explains how to carry out operations and tasks in line with international standards.

RISK ASSESMENT ON COVID-19 VACCINE TRANSPORTATION

We have assessed and identified potential risks to the product integrity of COVID-19 vaccines and taken measures to eliminate the risks.

HIGH LOADING PRIORITY AND TK PLUS COMBINATION

Covid 19 vaccines have high loading priority. Additionally, by TK Plus*, flown as booked guarantee is offered.

WE ARE AWARE OF OUR RESPONSIBILITIES

COV SPECIAL HANDLING CODE

We use a vaccine-specific handling code (COV) to facilitate tracking of Covid-19 vaccine shipments.

COVID-19 VACCINE TRANSPORTATION TASK FORCE

The Covid-19 Vaccine Task Force has been established to examine vaccine distribution scenarios and to prepare for Covid-19 vaccine transport in line with special requirements. In addition, vaccine transport processes are carried out with IATA trained expert personnel.

IATA CEIV PHARMA CERTIFICATE AND GDP-COMPLIANT OPERATION

We carry out our operations at global industry standards in accordance with IATA CEIV Pharma and GDP standards.

ADDITIONAL STORAGE ROOMS

Additional temperature controlled storage areas have been created to increase our capacity.

TK PHARMA CORRIDORS ON MORE THAN 400 ROUTES

We have created a Pharma & Medical Corridor between over 400 stations by carrying pharmaceuticals to important and certified destinations.

WE ARE AWARE OF OUR RESPONSIBILITIES

GROUP A TAPA FSR CERTIFICATE

Turkish Cargo holds the GROUP A TAPA (Transported Asset Protection Association) FSR certificate in order to reduce losses in the international supply chain and ensure the security of the facilities.

24/7 CONTROL TOWER

We have established a 24/7 COVID-19 Vaccine Transportation Control Tower to enable tracking of vaccines from origin to destination.

EASY AND QUICK RESERVATION

We provide easy and fast reservations via TK GO.

ACTIVE TEMPERATURE CONTROLLED CONTAINERS AND PASSIVE SOLUTIONS

We offer active temperature controlled containers and passive solutions thanks to the agreement with international container suppliers Envirotainer, CSafe, DoKaSch and va-Q-tec.

As Turkish Cargo supplying to more than 300 destinations around the world; we organize regular risk assessments and meetings with pharmaceutical companies, container suppliers, logistics companies and business partners.

In order to contribute to the cold chain, we have increased our dry ice limits in aircraft in line with Boeing and Airbus guidelines. For product qualifications at our stations, you can view the [TK Station Capability Matrix](#).

COVID-19 vaccine shipments are handled carefully by TK Pharma Care Team and through a number of industrial solutions such as thermal dolly, privileged apron transfer, audio-visual alarm system and telemetry system in storage rooms in the hub.

Flown as booked guarantee is offered with TK Plus combination. We offer customized solutions for large volume shipments (for example: charter/part charter solutions with freighters and passenger aircrafts), Transportation services by refrigerated trucks are offered all over the world.

* The aircraft limit may vary depending on the station capacity, destination of the cargo and also the priority cargo capacity available on the aircraft.

As Turkish Airlines, we provide you with the opportunity to include your own tracking device in your shipments from approved manufacturers so that you can collect detailed information in real time during the transportation of your cargo. Visit to take a look at current approved devices list.

Please visit the [COVID-19 Vaccine Solutions](#) page for details.
